**June 11, 2018**

MOUNT VERNON—At approximately 2pm today, Monday June 11, an automobile accident at Blackburn and S. 2<sup>nd</sup> Street has temporarily left the intersection without a traffic signal.

City of Mount Vernon Public Works is tending to repairs, and is hopeful that the signal can be fixed or replaced in the next 24 hours.

Until the signal can be replaced, drivers and pedestrians are urged to use extreme caution as they stop, and proceed slowly, at this “angled” 4-way intersection.

BNSF reports that the rail crossing signal and arms are functioning at this intersection.
