RE: Phase 1 Environmental Site Assessment
Alf Christianson Seed
101 E. Section Street
Mount Vernon, WA 98273
Property ID#s: P26788 (main), P121047, P53373 – P53379, P54113 – P54120, P54122,
P103224, P26886

MTC Project No.: **13B093**

Dear Ms. Buckley,

Materials Testing and Consulting, Inc. is pleased to present this Phase 1 Environmental Site Assessment for the above referenced project located at 101 East Section Street in Mount Vernon, Washington, including parcel numbers P26788 (main), P121047, P53373 – P53379, P54113 – P54120, P54122, P103224, P26886 listed by the Skagit County Assessor. The results of our assessment, opinions regarding site environmental conditions, and recommendations are found in the following report. This assessment was conducted in compliance with the standards set forth in ASTM Standard E 1527-05.

We welcome the opportunity to be of additional service to you. Please feel free to contact us if you have any questions or concerns.

Respectfully Submitted,
MATERIALS TESTING & CONSULTING, INC.

A handwritten signature in black ink, appearing to read 'Leland Rupp', is written over a light blue horizontal line.

10.5 EDR REPORTS.....60

1 Executive Summary

Materials Testing and Consulting, Inc. (MTC), has performed a Phase 1 Environmental Site Assessment at the subject property (101 E. Section Street, Mount Vernon, Washington – Parcels P26788 (main), P121047, P53373 – P53379, P54113 – P54120, P54122, P103224, P26886). The main parcel has recently been utilized for a seed processing, manufacturing, storage and shipping. The secondary parcels are currently developed as single and multi-family residential with some vacant lots present. This assessment was executed in order to identify recognized environmental conditions, conducted in accordance with ASTM E 1527-05, and includes the following elements as defined in this recognized standard: a site reconnaissance, interviews with relevant personnel, historical records review, a radius search, consultation of physical setting sources such as aerial photographs, topographic maps, and geologic maps, and review of available government records. In addition, MTC performed a request with the Washington Department of Ecology for subject property environmental records, and reviewed documents including prior site events, site assessments, and remediation reports, with results summarized herein. The environmental professional(s) that conducted this assessment are Licensed in Washington State as Geologists, Engineering Geologists, or Professional Engineers as specified in 312.10 of 40 CFR 312.

Environmentally regulated sites in the vicinity of the subject property identified by Radius Search performed under subcontract by Environmental Data Research (EDR) and review of the Washington State Department of Ecology Facility/Site Database are interpreted to be of a distance and elevation from the site which does not present an obvious risk to site environmental conditions from known past or present uses or activities, with possible exception of the nearby former *UNOCAL Service Station*, as discussed in Section 8 of this report. The position of the station, where underground storage tanks and LUST-impacted soil were removed, up gradient of the site and its generation of hydrocarbons suggests a recognized environmental condition for the site.

The main parcel of the subject property is in an area of industrial and storage use historically within the last approximately 30 to 60 years. Prior to the 1950s, as early as 1912, the site vicinity was used generally as lumber manufacturing and farmland. The main parcel of the subject property is developed with a paved-surface parking and storage lot occupying the majority of the exterior. Pavement in the eastern portion of the parcel is in generally good condition. Pavement to the west is in generally intact but cracked condition. The Alf Christianson site was purchased for seed processing use in 1972 and began erecting seed

processing and manufacturing buildings sequentially generally in the south to north direction. Building 1 is located at the south end of the site near E. Section Street and is considered outside the subject property of this investigation. MTC does not consider site use prior to 1912 to pose an obvious risk of a recognized environmental condition.

The site is currently non-operational. Visual site reconnaissance identified that all manufacturing buildings are intact and in a state of disuse. Historical documentation indicates that leaking of previous underground storage tanks did occur within the eastern and southern part of the ALFCo property and subsequent Interim Action Cleanups were conducted from 1990 to 1996. A 2001 Phase II and Phase III ESA and Site Characterization were conducted in the eastern and south areas. The Phase II and Phase III ESA stated results of soil and groundwater sampling did not encounter petroleum impact after abatement at the east tank area. The Site Characterization indicated continued residual presence of spilled fuels in two groundwater plumes at the south area, but that natural dissipation was expected over time.

During site reconnaissance and EDR documentation research, it was observed that a seed washing tank, located in the basement of the central manufacturing building, still remains with a containment area containing dark fluid with a surface sheen. Several pipes appearing to form an under-floor drain network ran through the basement to a common collection sump located in a sediment-filled sump in a partially sunlit alcove on the eastern side of the plant. Pipe penetrations into the wall of this sump are possibly routed to the City storm water system.

MTC recommends an exploratory environmental sampling program be conducted on the site exterior and interior (where accessible) with the goal of confirming the previous abatement of potential petroleum contamination from past use, as well as assessing the possible impact from pesticide-generating seed washing activities and past lumber treatment and manufacturing, which are historically generators of arsenic-containing compounds. MTC recommends that we be contacted at the client's discretion to discuss additional environmental investigation services. MTC anticipates a series of explorations distributed throughout the site for soil sampling and laboratory analysis may be sufficient initially to address the potential level and extent of existing concern, based on our understanding of site conditions at this time. Depending on the extent of scope and results of investigation, this may provide a reasonable level of understanding as to the presence or absence of petroleum contamination existing on the subject property.

2 Introduction

2.1 Purpose and Scope

The purpose of this report is to conduct all appropriate inquiry into recognized environmental conditions of the subject property according to accepted standards identified in ASTM E 1527-05 and to qualify the user of this report to meet one of the requirements needed for the innocent landowner defense provided under CERCLA. Per Section 3.3.31 of the ASTM standard a “recognized environmental condition” is defined as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the structures on the property or into the ground, groundwater, or surface water of the property. A “historical recognized environmental condition” is defined as a past environmental condition which may not be considered a current “recognized environmental condition” upon consideration of past site activities and current impacts. This report does not include *de minimus* conditions that generally do not present a material risk of harm to public health or the environment.

The scope of services provided in this environmental site assessment consists of the following:

- **Site reconnaissance** including a visual inspection of the property and any structures found on the property, limited to exterior and interior areas that are readily accessible. The site reconnaissance also includes visual and physical observations of adjoining properties. Information concerning current and past uses of the property and adjoining property was collected as relevant to recognized environmental conditions.
- **Records review** of federal, state and local sources that contain information about hazardous substances and underground storage tanks. This also includes a title history review.
- **Interviews** of the owner, key site manager, and applicable occupants of the property as well as relevant local government officials.
- **Map and aerial photo review** of the property and adjoining properties to characterize the geologic, hydrogeologic, and topographic conditions of the subject property in addition to its present and past uses.

- **Report preparation** that presents the environmental conditions encountered, opinions on site environmental conditions, and conclusions and recommendations for further investigation.

Users of this report are cautioned that local, state and federal regulations may require additional obligations outside the scope of this report.

2.2 Special Terms and Conditions

This assessment was executed in accordance with ASTM E 1527-05, "Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process". A Phase 1 ESA is site and time specific. It is applicable only to the parcel(s) identified herein for the given timing of the assessment. The findings and conclusions about the environmental conditions of the project site represent probabilities, not scientific certainties, based on the professional judgment of the environmental inspector. Without actual subsurface or surface soil and water sampling, which is outside the scope of this assessment, MTC presents the most likely environmental conditions of the property based on the available "eyes-only" and "ears-only" data. Future investigations may identify environmental conditions not recognized by this report if new information, technology, analytical techniques, or other factors become available. Our investigation reduces, but does not eliminate, uncertainty regarding recognized environmental conditions. The appropriate inquiry used in conducting this assessment was not exhaustive. However, a reasonable balance was achieved between the cost/time demands of information gathering and the need to reduce the uncertainty of environmental conditions.

2.3 Certification and Statement of Limiting Conditions

The text contained in Section 2.3 "Certification and Statement of Limiting Conditions" is credited to the Environmental Assessment Association.

Certification: The Environmental Inspector certifies to the buyer, seller and/or lender in a transaction as named in the inspection report "Principal Parties"; and the Inspector and the Principal Parties agree that:

1. The Environmental Inspector has no present or contemplated future (a) partnership with Principal Parties nor (b) an interest in the property inspected which could adversely affect the Inspector's ability to perform an objective inspection; and neither the employment of the inspector to conduct the inspection, nor the compensation for it, is contingent on the results of the inspection.

2. The Environmental Inspector has no personal interest in or bias with respect to the subject matter of the inspection report or any parties who may be part of a financial transaction involving the property. The conclusions and recommendations of the report are not based in whole or in part upon the race, color, creed, sex or national origin of any of the Principal Parties.
3. The Environmental Inspector has personally inspected the property, both inside and out and has made visual inspection of the adjacent property, to the extent possible by readily available access. The inspection does not include the removal of any soil, water or air samples, the moving of furniture or fixtures, or any type of inspection that would require extraordinary effort to access.
4. All contingent and limiting conditions are contained herein (imposed by the terms of the inspection assignment or by the undersigned affecting the conclusions and recommendations contained in the report).
5. This Environmental Inspection report has been made in conformity with and is subject to the requirements of the Code of Professional Ethics of the Environmental Assessment Association.
6. All opinions, conclusions and recommendations concerning the inspected property that are set forth in the inspection report were prepared by the Environmental Inspector whose signature appears on the report. No change of any item in the report shall be made by anyone other than the Inspector, and the Inspector shall have no responsibility for any such unauthorized changes.

Contingent and Limiting Conditions: The certification of the Environmental Inspector appearing in the environmental inspection report is subject to the following conditions and to such other specific and limiting conditions as are set forth by the Inspector in the report.

1. The Inspector assumes no responsibility for matters of a legal nature affecting the property inspected or the title thereto. The property is inspected assuming responsible ownership.
2. Any sketch appearing in or attached to the inspection report, or any statement of dimensions, capacities, quantities or distances, are approximate and are included to assist the reader in visualizing the property. The inspector has made no survey of the property.

3. The Inspector is not required to give testimony or appear in court because of having made the inspection with reference to the property in question, unless arrangements have been previously made.
4. This report is not intended to have any direct effect on the value of the property inspected but simply to provide a visual Environmental Assessment solely for the benefit of the Principal Parties.
5. The Inspector assumes that there are no hidden, unapparent, or latent conditions or defects in or of the property, subsoil, or structures, other than those noted on the inspection report or any addendum to the report that the Inspector has included. The Inspector assumes no responsibility for such conditions or for the inspection, engineering or repair which might be required to discover or correct such factors.
6. Information, estimates and opinions furnished to the Inspector, and contained in the report were obtained from sources considered reliable and believed to be true and correct. However, the Inspector has made no independent investigation as to such matters and undertakes no responsibility for the accuracy of such items.
7. The Inspector makes the Inspection and Inspection Report solely for the benefit and personal use of the Principal Parties. Disclosure of the contents of the Inspection Report is governed by the Bylaws and Regulations of the Environmental Assessment Association. No disclosure may be made of the Inspection Report without the prior written consent of the Inspector and the Inspector undertakes no responsibility for harm or damages to any party other than the Principal Parties.
8. Neither the Inspection Report, any part thereof, nor any copy of the same (including conclusions or recommendations, the identity of the Inspector, professional designation, reference to any professional organization, or the firm with which the Inspector is connected), shall be used for any purposes by anyone but the Principal Parties. The report shall not be conveyed by anyone to the public through advertising, public relations, news, sales, or other media, without the prior written consent and approval of the Inspector.

2.4 Qualifications of the Environmental Professionals Conducting this report

In order to provide qualifications for our Environmental Professionals as set forth in 40 CFR 312.21(d):

“We declare that, to the best of our knowledge and belief, we meet the definition of *Environmental Professional* as defined in 312.10 of 40 CFR 312”

And

“We have the specified qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.”

The environmental professional conducting this report is either: Licensed by the State of Washington as a Geologist; or conducting limited portions of the following Phase 1 Environmental Site Assessment process under the direct supervision of a Geologist Licensed by the State of Washington, as per section 312.10 (1)(i) and (5) of 40 CFR 312.

3 Site Description

3.1 Location and Legal Description

The subject property is located at 101 East Section Street, Mount Vernon, Washington (See Location Map, Section 10.1), and is comprised of the northern two thirds of a parcel, the southern one fifth of a parcel and 18 adjoining parcels on file with the Skagit County Assessor: Property ID numbers P26788 (main), P121047, P26886, P53373 – P53379, P54113 – P54120, P54122, P103224.

The legal descriptions of the parcels are as follows:

For APN/Property ID(s): P26788 (3.75 ac)

3.2 Site and Vicinity Physical Characteristics

3.2.1 Geologic Summary

According to the *Geologic Map of the Mt. Vernon 7.5-minute quadrangle, Skagit County, Washington* published by the USGS (Open-File Report 81-105, D.P. Dethier and J.T. Whetten, 1981) geology of the site vicinity and low lying areas to the west, north and south are comprised of Quaternary alluvium (Qa) deposited by the Skagit River system. East of the project area, as topography rises, deposits are mapped as Quaternary glacial deposits (Qe, Qva, Qvt) of the Everson Interstade and Vashon Stade. Alluvium of the Skagit River valley is generally described as sorted and interbedded clay, silt, and sand deposits with lesser occurrences of coarse sand and cobbly gravel. Glaciomarine drift in the region is typified by primarily silt and clay deposits, relatively unsorted containing coarse material and local lenses of coarse-grained outwash. Vashon-age till is generally unsorted, unstratified, and consolidated from glacial ice sheet advance.

Primary soils at the site and its vicinity are mapped as *Urbanland, Mt. Vernon-Field Complex*, a moderately well drained soil, classified as Hydrologic Group C, representing a slow infiltration (NRCS web soil survey). Generally, urbanland classification refers to soils that are highly variable at a local scale. Prior to urban development, soils in the vicinity were likely a composition of *Mt. Vernon* and *Field* soils. *Mt. Vernon* soils are generally stratified ashy sandy to fine sandy loams and silt loams. *Field* soils are generally silt loams gradating to stratified sand to loamy fine sand and very fine sandy loam with depth (NRCS web soil survey). The winter seasonal water table is typically greater than 7 feet below the surface (EDR Radius report with GeoCheck).

3.2.2 Hydrogeologic Summary

A groundwater survey was outside the scope of this report. Hydrogeologic conditions for the subject property were inferred from well logs obtained on the Washington State Department of Ecology website, other geotechnical reports completed at nearby properties, available geologic and topographic maps, and regional well log data as readily available. Based on this information it is likely that local near-surface groundwater flow and surface runoff is generally directed in a roughly westerly direction in the immediate vicinity of the subject property. Topographic profiles to the north, south, and west exhibit similar elevations to the subject property. Eastward topography rises on a west-facing slope rising to a plateau outside the vicinity of the subject property. Although due to the rolling nature of area topography on the site scale, local variations may exist as shallow groundwater flow may vary similarly to topography from site to site. Also

both the elevation of the water table and direction of groundwater movement can vary according to seasonal weather conditions. Based on soil survey data and local knowledge, the water table is expected to be greater than 7 feet from the surface in the winter months.

The Skagit River is approximately 1500 ft away to the west of the site. The entirety of the site is mapped within the 100-year flood plain.

3.3 Site Description

3.3.1 Public Utilities

According to available information and interview with the current manager, the site is serviced by City water and sewer. No active or decommissioned drinking water wells or irrigation wells are known to be present on site.

3.3.2 Roads

Currently, primary vehicle access into the main subject property is currently provided by Railroad Ave north of Union St. The secondary parcels to the east of the main parcels are vacant lots accessed by South 6th St. The western edge of the main subject property has limited vehicle access via a gated and barricaded dirt road connecting East Kincaid St and East Section St.

3.3.3 Building Conditions

At present there are at least four permanent buildings located on the main parcel of the subject property. There are three buildings to the south that are part of the original ALFCo plant but are not specifically within the study area of this Phase I ESA. There is one building to the north that is part of the original ALFCo plant but is not specifically within the study area. The buildings are currently in a state of disuse, but seed processing and manufacturing facilities have not been fully removed.

Building 1, the original multi-story seed processing building, is located on the southern boundary of the main parcel near Section Street. The property was originally purchased and developed by Alf Christianson in 1972. The building is approximately 10,000 square feet and appears to be constructed of wood framing with a basement and shallow foundation and brick siding. The building is currently vacant.

The two south area buildings are approximately 10,000 square feet each and are seed processing and storage utility buildings, constructed of metal framing on a shallow foundation with basements and a metal roof and siding are located between Building 1 to the south and the

central complex to the north. The central portion of the parcel is occupied by two approximately 30,000 square foot seed processing, shipping, laboratory and office buildings constructed of wood framing on a shallow foundation with basements and metal siding.

The two north area buildings are approximately 30,000 square feet each and are seed storage and shipping facilities, constructed of metal framing on a shallow foundation and metal roof and siding.

The one north building outside of this study area is approximately 30,000 square feet and is seed storage and shipping, constructed of metal framing on shallow foundation and metal roof and siding.

3.3.4 Surface Conditions

The subject site and vicinity are fully developed. The main parcel is developed with large industrial buildings bordered by asphalt and gravel. Secondary parcels (P54115 – P54122, P53375 – P53378) are vacant lots formerly occupied by single family private residences. Currently, secondary parcels are gravel vacant lots partially to completely overgrown by grass, shrubs, trees. Throughout the subject site there are various piles of refuse, both from industrial and presumably private sources.

3.4 Uses of Subject Property and Adjoining/ Surrounding Properties

3.4.1 Current Use of Site

All parcels of the subject site are currently vacant. A study of historical aerial photos and Google street view images reveals that residential homes formerly occupying parcels in the eastern portion of the subject site (P54115 – P54122) were demolished between 2011 and 2012. A few residential homes occupied the parcels in the northeastern portion (P53375 – P53378) were demolished between 2009 and 2011.

3.4.2 Past Use of Site

MTC performed a review of available site and area documentation as well as a search of the chain of title for the subject properties, a review of aerial photography, certified Sanborn map, and the results of the City Directory searches to evaluate past uses of the subject properties.

The main subject property is shown in the certified Sanborn map as having been developed as industrial land in the form of a lumber, coal, and hay storage as early as 1912. The northern portion of the site was operated as a lumber yard until around 1957. The southwestern portion of

the site was developed with industrial buildings for a cold storage facility by 1948 (due to poor resolution, structures are not identifiable on the 1941 aerial photo). The parcel was purchased by the Alf Christianson Seed Company in 1972 after which time the site was developed into the current configuration of industrial/agricultural buildings. The site was operated as an agricultural seed and bulb producer until the 2000s at which time it was vacated.

Residential homes in the eastern portion of the subject property were constructed around 1906. Some residential homes were removed for the expansion of the Alf Christianson property in 1970s. The remainder of the residential homes were removed in the 2010s.

3.4.3 Current and Past Use of Adjoining Properties

The site is within an area of past and present mixed commercial and residential use. Currently adjoining properties include light commercial and industrial, commercial, residential, and municipal. Past uses of adjoining properties include the following:

- To the north: Mount Vernon Skagit Transportation Center (bus and train station).
- To the west: Residential homes.
- To the east: I-5 Corridor and an apartment complex
- To the south: Residential homes and light industrial (Schenk Packing).

Historical documents show that adjoining residential properties were developed in the early 1900s. Previous land uses for those properties were not reported. Other uses of adjoining properties include the following:

- To the north: Gas stations occupied the parcels immediately north of the subject property from the late 1950s. Review of Washington Department of Ecology documents reveals that underground storage tanks associated with these facilities were listed as closed in 1993 and removed by 1996. Gas stations were likely in operation as such until the early 1990s.
- To the east: The I-5 corridor was first developed as a limited access highway in the early 1950s. Prior to construction as a highway, the land was undeveloped and residential.
- To the south: Immediately to the south of the subject parcel, the southern portion of the main parcel has been light industrial use since the 1940s.

3.4.4 Surrounding Area

The site vicinity is within the area of downtown Mount Vernon. The area is, and has been since the early 1900s, of mixed municipal, residential, commercial, and industrial use. The areas north of the subject property have historically been the primary commercial and municipal district for downtown Mount Vernon. Areas to the west, south, and east of the subject property are primarily residential with some light commercial and industrial uses. Historical photos suggest that some areas may have had light manufacturing uses.

3.5 Site Documents

Documents relating to building and site development specific to the subject property were queried via public disclosure request submitted to the City of Mt. Vernon and Skagit County offices. MTC received response from both entities citing no records were available for review relevant to the request at the time of this report.

According to the Skagit County Assessor, there are 8 buildings on the main parcel of the subject property. The Skagit County Assessors website did not list the date of construction on any of the buildings. Presumably, the buildings were constructed after Alf Christianson Seed Company acquired the parcel in 1972. The building sizes are: 1,152 square feet; 4,586 square feet; 9,300 square feet; 5,372 square feet; 45,940 square feet; 12,498 square feet; 3,696 square feet; and 20,224 square feet.

At the time of this report, no other historic documents associated with the subject property were available or discovered within this assessment relevant to recognized environmental conditions at the site. The Phase 1 ESA research did not uncover any site documents directly relating to or providing details on any potential past uses of the property.

3.6 Environmental Liens

The user of this report did not report or identify any environmental liens associated with the subject property. No environmental liens were found during our records review for this site. Parties interviewed were not aware of any past or existing environmental liens.

4 Environmental Data Records Review

4.1 Standard Environmental Record Sources, Federal and State

Results of the standard environmental records review are presented in Table 1. Explanations of the sources follow the table and are detailed in the EDR Radius Search found in the appendix. Absence from any of the lists below does not necessarily mean that the project site is free of hazardous substances or petroleum products. EDR performed the radius search in accordance with ASTM Standard E 1527-05.

Table 1. Summary of EDR Radius Search Findings

Source	Code	Search Radius (Miles)	Identified Sites
Federal RCRA Generators	RCRA-LQG	1/4	0
State and tribal-equivalent NPL	HSL	1	6
State and tribal-equivalent CERCLIS	CSCSL	1	14
State and tribal landfill/solid waste disposal site lists	SWF/LF	1/2	0
State and tribal leaking storage tank lists	LUST	1/2	8
State and tribal registered storage tank lists	UST	1/4	13
State and tribal voluntary cleanup sites	VCP	1/2	4
	ICR	1/2	9
Local lists of landfill/solid waste disposal sites	SWRCY	1/2	1
Local lists of hazardous waste/suspected contaminated sites	ALLSITES	1/2	46
	CSCSL NFA	1/2	9
Other ascertainable records	RCRA NonGen/NLR	1/4	1
	DOD	1	0
	MANIFEST	1/4	0
EDR exclusive records	EDR Hist Auto Stat	1/4	3
	EDR US Hist Cleaners	1/4	2

RCRA-LQG/SQG: The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). LQG designation relates to large quantity generators. CORRACTS designation refers to sites undergoing corrective action.

HSL: Hazardous Sites List. A subset of the CSCSL. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM). Indicates priority cleanup sites.

CSCSL: Confirmed and Suspected Contaminated Sites List. State hazardous waste site records, the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund, including HSL sites) are identified along with sites where cleanup will be paid for by potentially responsible parties. Includes sites suspected of contamination awaiting further assessment. Sites delisted are transferred to NFA list.

SWF/LF: Solid Waste Facility Database. Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

LUST List: Leaking Underground Storage Tank. Washington Department of Ecology compilation of sites that are known to have leaking underground storage tanks. An underground storage tank is defined as any tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more below the ground surface.

Registered UST List: Underground Storage Tank. Washington Department of Ecology compilation of sites that have underground storage tanks.

VCP: Voluntary Cleanup Program Sites. Sites that have entered either the Voluntary Cleanup Program or its predecessor Independent Remedial Action Program.

State ICR: These are sites where remedial action reports have been received by the Department of Ecology, but actions have been conducted without department oversight.

SWRCY: Recycling Facility List. A listing of recycling center locations.

State ALLSITES: Facilities identified as sites of interest by the Department of Ecology.

CSCSL NFA: Sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination.

RCRA NonGen / NLR: RCRA – Non Generators. RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

DOD: Department of Defense sites.

US MINES: Mines master index file.

MANIFEST: Hazardous Waste Manifest Data.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations. EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto

service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners. EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

4.1.1 Discussion of Records Search Results

The EDR Radius Search identified a total of 116 database entries among 67 distinct sites listed in 12 environmental databases within up to a 1 mile radius of the subject property. Sites listed fell under: 1) Hazardous Sites List (HSL), State and Tribal equivalent NPL; 2) Confirmed and Suspected Contaminated Sites List (CSCSL), State and Tribal equivalent CERCLIS; 3) Sites with registered State or Tribal leaking underground storage tanks (LUST); 4) Sites with registered State or Tribal underground storage tanks (UST); 5) State or Tribal voluntary cleanup sites (VCP); 6) State or Tribal voluntary cleanup sites (ICR); 7) Local list of landfill/solid waste sites (SWRCY); 8) Facility/Site Identification System Listing (ALLSITES); 9) Sites previously on the Confirmed and Suspected Contaminated Sites Lists that have received the "No Further Action" designation; 10) Federal RCRA non-generators list (RCRA NonGen/NLR); 11) EDR exclusive list of historical gas stations (EDR His Auto Stat); 12) EDR exclusive list of historical dry cleaners (EDR US Hist Cleaners).

The Washington State Department of Ecology (WA DoE) Facility/Site Database map utility was queried for any additional sites of environmental significance in the site vicinity not listed by the EDR Radius Report. No additional notable sites were found.

MTC does not consider most sites identified during our records review and radius search to pose an obvious risk or past or present recognized environmental condition to the subject property. Excepting the site discussed below, such environmentally regulated sites in the vicinity of the subject property are interpreted to be of a distance and elevation from the site which does not present an obvious risk to site environmental conditions.

Sites to the north of the subject property have a known history of development as gas stations. According to the EDR report these sites have had USTs and LUSTs removed by the mid-1990s.

These sites are listed with the Washington Department of Ecology voluntary cleanup priority (VCP) and independent cleanup registry (ICR). The Washington Department of Ecology has also designated these sites as “No Further Action” required (NFA).

Environmental records for the subject property likely present the greatest impact to the environmental condition of the subject property. According to the EDR report, the subject property is listed in multiple environmental records databases. Notable listings include: Hazardous waste generator (1995, WA ALLSITES); Petroleum spill (2001, WA SPILLS); Leaking underground hazardous waste storage tanks (1987, 1990; WA ALLSITES, WA CSCSL NFA, WA UST, WA VCP); Toxic voluntary cleanup priority (WA ALLSITES, WA CSCSL NFA, WA UST, WA VCP). Five underground storage tanks are listed in the EDR report, three of which were removed, one is listed as exempt, and one is closed in place as of 1996. The site is listed in the CA HAZNET database for the disposal of pesticide rinse water. The site is listed in the RCRA NonGen, NLR database as a hazardous waste handler.

4.2 Environmental Agency Records Requests

4.2.1 Health Department Records Request

The Skagit County Health Department was queried by Public Records Request for any information on file for the subject property relevant to present or past site environmental conditions or interactions. The County stated that records should be available with the City of Mount Vernon or other agencies.

4.2.2 Washington Department of Ecology Contact

The Washington Department of Ecology was queried by Public Records Request for any information on file for the subject property relevant to present or past site environmental conditions or interactions. The Department stated that records were available with the State. The records were made physically available by appointment on October 18, 2013.

4.3 Physical Setting Sources

Sources used to describe the geology, hydrology, topography and other physical aspects of the property are listed below.

1. Environmental Data Resources Inc. (2013) EDR Radius Map Report with GeoCheck: 101 E. Section Street, Mount Vernon, WA. (Inquiry Number: 3710110.2s on August 28, 2013).

2. Environmental Data Resources Inc. (2013) Historical Topographic Map Report: 101 E. Section Street, Mount Vernon, WA. (Inquiry Number: 3710110.4 on August 29, 2013).
3. Environmental Data Resources Inc. (2013) Aerial Photo Decade Package: 101 E. Section Street, Mount Vernon, WA. (Inquiry Number: 3710110.5 on August 29, 2013).
4. National Resources Conservation Service Web Soil Survey 2.0 Map.
5. <http://websoilsurvey.nrcs.usda.gov/app/>
6. United States Geological Survey (1981) *Geologic Map of the Mt. Vernon 7.5-minute Quadrangle, Skagit County, Washington, Open File Report 81-105 (Dethier, D.P. and Whetten, J.T.)*.

4.4 Historical Use Information

4.4.1 References

3. Environmental Data Resources Inc. (2013) City Directory: 101 E. Section Street, Mount Vernon, WA. (Inquiry Number: 3710110.6 on September 3, 2013).
4. Environmental Data Resources Inc. (2013) Aerial Photo Decade Package: 101 E. Section Street, Mount Vernon, WA. (Inquiry Number: 3710110.5 on August 29, 2013).

4.4.2 Title History

The title history was accessed via Skagit County Assessor on-line property records search. Parcels have had various transaction histories since record keeping began. All parcels within the subject site share the same chain of title after purchase by Seaward Investments in 2003. MTC does not consider the chain of title for residential properties prior to 2003 to be consequential to the scope of this study. See section 10.4 for tabular results of this title review.

5 Historical Document Review

5.1 Former UNOCAL Service Station

A No Further Action letter was filed on September 25, 1997, for former UNOCAL service station 4913, located at the north end of the existing ALFCo property, which cited previous remedial action reports filed with the Department of Ecology dating back to 1985. The Department of Ecology issued a response letter on December 17, 1997, which recommended conditional no further action with respect to the leaky underground storage tank database.

5.2 Previous Site Characterization Report

On January 3, 1996, a Gasoline Contamination Beneath Building 1 and Former Bargreen Property letter was issued regarding the area south of the southernmost ALFCo building near Section Street. This letter stated that groundwater sampled in the former Bargreen Property vicinity had TPH and BTEX levels that were elevated. It also stated that the groundwater samples taken beneath Building 1 resulted in TPH and BTEX below the MCLs. A site characterization report was filed for the south location of the ALFCo Plant Site on October 15, 2001. An Independent Remedial Action letter was filed for ALFCo Building #1 on December 26, 2001, which recommended conditional no further action was required with respect to the South Location of the ALFCo Seed Company, and referenced independent remedial action report filed October 5, 2001.

5.3 Previous Phase II & Phase III Environmental Site Assessment

A phase II environmental site assessment was performed by Northwest HydroGeo Consultants in 2001. The Phase II ESA covered soil and groundwater samples, surface hydrology, subsurface geology and stratigraphy, future contamination potential, and cleanup feasibility for the location of two previously removed underground storage tanks at the east side of the central plant complex. These consisted of one 1,000-gallon gasoline tank and one 2,000-gallon diesel tank. The report indicated that hydrocarbon leak was likely due to overfilling or spilling not associated with ruptures in the tanks. The study was performed as a means to determine the extent of soil and groundwater contamination at the east tank site. Analysis was performed on groundwater and soil samples from 3 bore holes at the eastern tank site.

The phase III ESA completed by Northwest HydroGeo Consultants was conducted during excavation of soils impacted by the previous tanks. Three groundwater monitoring wells were installed and monitored. Soils and groundwater analytical results indicated that residual levels of

hydrocarbons within the tank excavation area were reduced to levels below the MTCA standard and conditional No Further Action was recommended.

5.4 Results and Conclusions

The soil and groundwater analyses from the 2001 Site Characterization Report for the south area including former tank removal indicated that conditional no further action was recommended. Analytical results indicated that some residual hydrocarbons within two possible plumes, but were expected to dissipate naturally. As groundwater flow direction is expected to be in the southwest direction from the site, the south area is expected to produce minimal if any effect from south site residual hydrocarbons onto the subject property, whose southern boundary is located to the north at approximately the central portion of the site. The soil and groundwater analyses from the 2001 Phase II and Phase III ESA report for the east tank removal concluded that no further action was recommended. Analytical results indicated that impacted soil had been remediated to levels below the MTCA cleanup standards. A 1997 Department of Ecology letter was issued concerning the underground storage tank removal and impacted soil abatement at the former UNOCAL station to the north of the subject property. This letter issued a conditional no further action with respect to the tank removal area at the former UNOCAL property. A 1997 Remedial Soil Excavation report indicated that there was possible mobilization or transport of fuels leaked by former tanks. Since groundwater flow at the north of the subject property is also expected to be in the southwest direction, there exists potential for transport of hydrocarbons onto the subject property, which is located adjacent and to the south.

6 Site Reconnaissance

6.1 Methodology and Limiting Conditions

The site reconnaissance was performed during the period of September 4-5, 2013 by an environmental professional of MTC, Inc. Weather conditions at the time of the visit were clear and dry with temperatures in the mid-70s. Aside from obstructions of visible surface conditions due to local areas of thick vegetation, stored goods, and parked vehicles, no other limiting factors were encountered during exterior site reconnaissance. The subject property was traversed on foot, and surrounding properties were inspected and photographed. Bordering areas and neighboring sites were observed from the perimeter of the subject property and adjacent publicly accessible locations.

Reconnaissance was conducted among interior industrial-commercial and office spaces, in accordance with ASTM E 1527-05 guidelines. The exteriors of multiple site buildings were observed.

The site contains common interior spaces for industrial and office use. A manufacturing complex, including seed sorting, cleaning, storage and shipping buildings as well as office buildings, was opened systematically from south toward the north and visually inspected as accessible. However, no attempt was made to move stored items; nor were all contents catalogued.

6.2 General Site Setting

Observations during site reconnaissance confirmed the primarily residential, commercial, and municipal use of the immediate site vicinity. The area to the north appears in use as a public parking area. The development directly east of the site to East 6th Street continuing to Interstate 5 is residential, single and multi-family dwellings. West of the property is the railroad track and residential property beyond that. Confirmed south of the subject property and East Section Street is currently residential use. Visible conditions along the boundaries of the property and surrounding area were consistent with reviewed physical setting sources including recent aerial photos.

6.3 Exterior Observations

At the time of the visit, the buildings formerly used for the seed manufacturing, sorting, weighing, and shipping were generally not occupied and appeared consistently in a state of disuse for commercial or industrial purposes. Site common corridors were generally maintained.

Minor *de minimus* pavement staining from passenger vehicles was observed locally on common roadways and parking areas. Power poles and fixtures throughout the site appeared in decent condition viewed from afar, however if transformers are present they may be of an age to contain PCBs.

Processing, shipping, and office buildings appeared to be nominally maintained. Building 1 and the southern processing buildings generally possessed wooden floors, while the northern processing building near shipping possessed concrete flooring. All buildings possessed sublevels or basements. Building 1 possessed wooden main floors and soil sublevel floors. Within the southern seed processing buildings, aside from small to medium sized commercial-use cans of cleaning, maintenance, and fuel supplies, no drums or barrels of an unknown nature were observed. Within the central shipping processing buildings, aside from small to medium sized commercial-use cans of cleaning, maintenance, and fuel supplies that were visible first and upper floors, drums or barrels of an unknown nature were observed in the sublevels and basements. The noted conditions were of a size, nature, and extent to be interpreted as *de minimus* site conditions considering the commercial use of the subject property.

Immediately to the west of the central processing and shipping buildings was a chain link fence running from south to north along the western side of the property and the ALFCo complex. A north-south running gravel access road and railroad track were located to the west of the fence.

Monitoring wells were visible at the south end of Building 1 in a paved area just north of Section Street. These were documented as having been associated with earlier environmental monitoring associated with removal of a 1,000-gallon underground storage tank in 1990. The well casings were observed to be intact, and they generally surround an area of approximately 40 feet by 40 feet where the tank and soil was removed and the pavement was replaced. No evidence of petroleum products use such as outer staining on the tanks or spills on the ground surface was observed.

Generally the asphalt pavement appeared intact from south area moving toward the north. Extensive cracking was observed throughout the pavement. Vegetation was generally growing up through the cracks in the pavement and did not generally appear to be distressed, although some plants were apparently dead at the time of this investigation. The area around Building 1 continuing past the southern buildings north toward the central portion of the plant was unpaved and consisted of gravel. The paved areas to the east of the plant were generally less cracked and were not penetrated by vegetation.

The visual site reconnaissance did not encounter any obvious evidence of existing environmental conditions on the site. No apparent hazardous conditions were visible, although monitoring wells were observed on site or on sites adjacent to the subject area. No obvious evidence of potential unknown underground storage tanks was observed. Evidence of past removed underground storage tanks was identified, as stated above. Excluding *de minimus* conditions of common materials and industrial or manufacturing products, especially on the eastern side of the complex, there were no stockpiles of solid waste, nor indications of past disposal of hazardous waste. No spills, large stains, or conspicuous stressed or absent vegetation was noted. There were no pits, ponds, or lagoons on site. Therefore the exterior site reconnaissance confirmed site use and did identify some historical potential recognized environmental conditions.

6.4 Interior Observations

The seed processing, shipping, and office buildings were accessible at the time of our visit. The interior of the south seed processing buildings was in a dormant condition and appeared to be absent of any current manufacturing activity. The buildings generally were absent of supplies, but they still contained components of the seed sorting and manufacturing process, such as bag houses, filtration vessels, and pipe and duct work. Within the southern buildings, any remaining materials were organized, with no obvious evidence of past or present spills of hazardous substances. Within the basement of Building 1, the earthen floor contained several piles of unused seeds. Within common areas or wash rooms, small to medium container goods were stored including cleaning supplies, paint or stain cans.

The interior of the central seed processing and office buildings was in a dormant condition and appeared to be absent of any current manufacturing activity. The buildings generally were absent of supplies, but they still contained components of the seed sorting and manufacturing process, such as bag houses, filtration vessels, and pipe and duct work. Within the central buildings, any remaining materials within the upper floors were organized, with no obvious evidence of past or present spills of hazardous substances. The office areas and seed laboratory were in a state of disuse from normal office activities and various human consumable products indicated sporadic use from nomadic habitation. Within the basement of the central buildings, the presence of concrete flooring was apparent. Lighting was very limited during the investigation and was provided with the use of flashlights. Within common areas or wash rooms, small to medium container goods were stored including cleaning supplies, paint or stain cans. Potential evidence of drug use was present in the north buildings, although it was not clear if drug manufacturing has occurred.

Located at the eastern side of the central portion of the complex, a sump of approximately 5 feet by 20 feet was observed within a sub-level interior-exterior alcove. This sump contained residual soil with some mossy vegetation growing where sunlight was available. The sump appeared to collect fluids or materials from pipes running from the sub-levels within the basement. There were also two subsurface pipes of approximately six to eight inches diameter embedded into the concrete wall of the sump. The ultimate destination for these pipes was not verified. Since there are storm water access points visible within the paved areas outside the plant, this may be a destination. As the sub and basement levels of the central buildings were investigated continuing from this sump alcove, it was apparent that several pipes of various diameters were running from beneath the first floor level, into a collection network, and ultimately to this sump.

A large metal open-top tank approximately ten feet by eight feet with a height of six feet was encountered during the sub-level reconnaissance of the central area and was noted to be located toward the western side of the building footprint. This tank was located within containment approximately one to two feet wider than the tank around its perimeter. Although the depth was not directly sampled during this investigation, the containment appeared to have an oily, dark liquid, of approximately one foot depth, with a visible surface sheen. Deceased wildlife or pests, possibly rats, were visible within the liquid. The tank had an associated shaft located adjacent to it in a dismantled condition. Several containers of coolant and lubricant materials were located nearby. A fine-grained, partially desiccated residue was observed in the tank bottom. Pipes connected to the under-floor pipe network were observed to run to and possibly from the tank. A small approximate eight-inch circular sump or collection drain was observed in the concrete basement floor and appeared to be soil or gravel filled. The continuation or destination of this sump or collection drain was not verified.

The interior of the north seed processing, shipping and storage buildings was in a dormant condition and appeared to be absent of any current manufacturing activity. The buildings generally were absent of supplies, but they still contained components of the seed sorting and storage, such as heating/drying units, and duct work. Within the northern buildings, any remaining materials within the upper floors were organized, with no obvious evidence of past or present spills of hazardous substances. The storage and shipping areas were in a state of disuse from normal office activities and various human consumable products indicated sporadic use from nomadic habitation. Lighting was limited in some parts of the larger buildings during the investigation and was provided with the use of flashlights. Within common areas or wash rooms, small to medium container goods were stored including cleaning supplies, paint or stain

cans. Potential evidence of drug use was present in the north buildings, although it was not clear if drug manufacturing has occurred. Within the large storage and shipping building in the north area, the ceiling material was observed to be of a potentially fibrous nature and installed in the approximate timeframe that may suggest the presence of asbestos containing materials.

7 Interviews

7.1 Site Manager

The knowledgeable current owner and site manager parties were contacted by phone and on site to discuss current and past site use and identify any potential environmental conditions on the subject property. From September 4 to 5, 2013, the current owner representative, Mr. Marvin Anderson, participated in an interview at the subject property.

A site interview was conducted with:

- Marvin Anderson (site manager)

Mr. Anderson confirmed that Christiansen Seed has owned and managed the property for approximately 41 years and is generally knowledgeable of its present use and recent history. He stated that any manufacturing had ceased by approximately 2010, and he is the site manager at this time.

7.1.1 Hazardous Conditions/Substances in Connection with Identified Uses

Respondent was not aware of any hazardous substances such as chemicals or controlled wastes existing on site associated with the current or past identified uses. No past site use for manufacturing or industrial purposes was known. No hazardous conditions were reported. Mr. Anderson was not aware of specialized oil/grease separators in use, and he was not aware of any releases of oils or greases into the drain system from the processing operations.

7.1.2 Hazardous Substances/Petroleum Containers and Unidentified Substance Containers

Respondent did not cite the recent typical commercial or industrial use of petroleum products on site to his knowledge. Other chemicals and storage containers are believed to be of a grade and sized to accommodate the servicing of processing equipment, are stored upright and intact, and are not of particular concern, with possible exception of two partially full 55-gallon drums within the basement of the central building. He stated that he was not aware of any large petroleum containers or stockpiles, or hazardous substances stored on site. He was aware of the large seed washing tank in the basement of the central building and its associated containment area, which contained fluid at the time of this investigation.

7.1.3 Storage Tanks (ASTs, USTs)

Respondent stated that to his knowledge no storage tanks for hazardous substances currently exist on site. Mr. Anderson stated that to the best of his knowledge there had previously been

one or more underground storage tanks located in the west paved area near the main office and weigh station and had been removed prior to this investigation. No stationary operational above-ground storage tanks for petroleum fuel, hazardous substances, or waste substances are known to have existed on site. The large tank located in the basement of the central plant was stated to have been part of the seed processing operation, possibly a seed washing tank.

7.1.4 Indications of PCBs

Respondent was not aware of any concerns existing on site associated with the presence of PCBs currently or in the past. Several coil-type transformers were observed within the central complex but appeared to be fluid-free.

7.1.5 Indications of Solid Waste Disposal

Respondent was not aware of any environmental concerns existing on site associated with solid waste disposal, either improperly deposited or permitted, currently or in the past. While Mr. Anderson was not specifically aware of hazardous or solid waste disposal, he was able to verify the presence of several randomly placed or disposed sealed batteries and containers, which did not appear to be leaking at the time of this investigation.

7.1.6 Historical Recognized Environmental Conditions

Respondent was not aware of historical recognized environmental conditions on the subject property prior to his involvement, with exception of the removal of one or more underground storage tanks, which he recalled may have been located at the west side of the central building complex. This location would be on the opposite side of the plant from the previously removed underground storage tanks located on the eastern side. Mr. Anderson also noted that the ceiling material within the large north storage and shipping building appeared to be of a fibrous nature and had been installed approximately 40 years ago. While it is not within our scope of investigation, the presence of such materials is generally considered to pose a high risk for the presence of asbestos.

7.1.7 Surrounding Area Environmental Conditions

Respondent was not aware of any environmental conditions existing on adjacent and nearby properties. When asked regarding any potential concerns among sites bordering the subject property presently or in the past, he was not aware of any issues.

7.1.8 Additional Information

The presence of woody materials was verified during MTC's geotechnical drilling program, which was performed concurrently with this Phase I ESA. Known site use as a lumber production facility prior to the installation of the AFLCo plant in 1972 is possible evidence of a historical recognized environmental condition, insofar as chemicals associated with the lumber treatment process have historically been known to contain arsenic compounds of a hazardous nature.

7.2 Local Knowledgeable Officials

7.2.1 Local Health, Fire, and Planning Departments

The Skagit County Health Department confirmed that documentation for the ALFCo plant site may be available from the City of Mount Vernon or Department of Ecology. They did not have information on file for the property.

8 Opinions of Significant Findings

Most environmentally regulated sites in the vicinity of the subject property identified by EDR Radius Search and review of the Washington State Department of Ecology Facility/Site Database are interpreted to be of a distance and elevation from the site which does not present an obvious risk to site environmental conditions. One possible exception is the former UNOCAL fueling station located to the north and adjacent to the property, which was a known LUST site that underwent underground storage tank removal and subsequent monitoring from 1990 to 1996 and received a conditional no further action determination from Department of Ecology with respect to the former tank location in 1997. MTC does not consider the nearby sites identified during our records review and radius search to pose a significant risk of past or present recognized environmental condition to the subject property, with the potential above exception. The following nearby and on-site conditions would, therefore, be considered for further study based on available information at this time:

1) Historic gas stations to the north of the subject site existed from 1950s to the early 1990s. Public records document underground storage tanks, leaking underground storage tanks, and petroleum spills at this site. The historical gas station is of close enough proximity to the subject site that it could have contributed to a recognized environmental condition at the subject site presently.

2) The subject property has been a site of industrial/agricultural production use since the 1940s. Prior to the 1940s the site was primarily lumber production facility. MTC does not consider site use prior to the 1912 to pose an obvious risk of a recognized environmental condition. Site use from 1912 to 1957 as a lumber and cold storage facility may have contributed to a recognized environmental condition at the site presently. Site use after 1972 as an industrial/agricultural producer and pesticide washing facility and storage of underground fuel storage tanks may have contributed to a recognized environmental condition at the site presently.

Secondary parcels at the subject site have been occupied by residential homes since the early 1900s. MTC does not consider site use as residential homes to pose an obvious risk of a recognized environmental condition.

In this case, MTC recommends an exploratory environmental sampling program be conducted on the site with the goal of assessing the general presence and extent of residual or groundwater potential petroleum contamination from past and current use, as well as that of arsenic-

containing or other compounds associated with lumber treatment, and pesticide compounds potentially concentrated and collected during the seed washing process.

9 Conclusions and Recommendations

We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-05 for the subject property, the Alf Christiansen Seed and adjoining parcels 101 East Section Street, Skagit County Parcels: P26788 (main), P121047, P53373 – P53379, P54113 – P54120, P54122, P103224, P26886, in Mount Vernon, Washington. Any exceptions to, or deletions from, this practice are described in Section 2 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property except for the following:

- Known site history as an industrial/agricultural facility with documented underground storage tanks (USTs/LUSTs) and petroleum-hydrocarbon surface spills.
- Existing facility up-gradient for groundwater flow listed as a former UST/LUST and petroleum-hydrocarbon surface spill.
- Known site history as an industrial/agricultural facility with potential pesticide generation and concentration and prior lumber production and treatment.

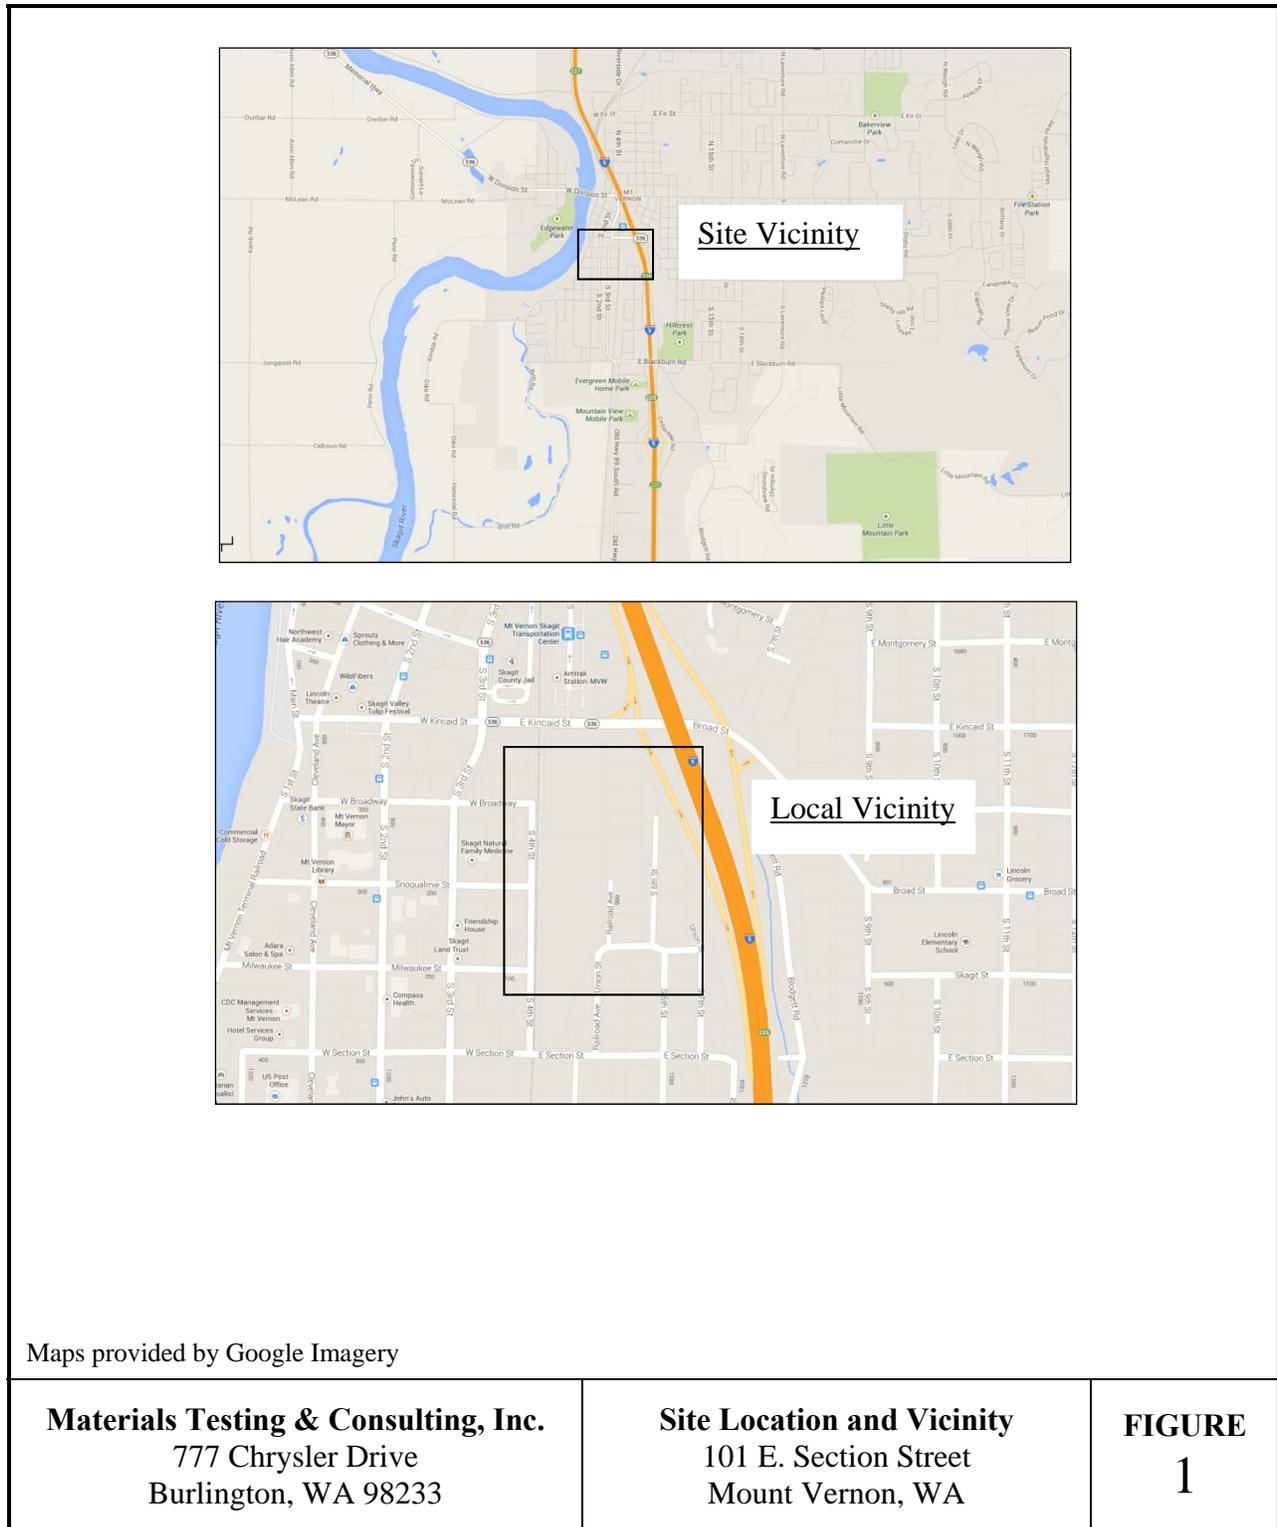

MTC recommends a limited exploratory environmental sampling program be conducted on the site exterior and interior (where accessible) with the goal of confirming abatement of previously spilled hydrocarbons and assessing the general presence and extent of impact from pesticides and lumber treatment compounds from past use. MTC recommends that we be contacted at the client's discretion to discuss additional environmental investigation services.

MTC understands the client proposes to remove the existing buildings for site redevelopment. Therefore the condition of building interiors in present disuse as manufacturing and storage are considered insignificant for the purpose of this Phase 1 ESA.

10.4 Title History and Chain of Title

The title history was accessed via Skagit County Assessor on-line property records search. Parcels have had various transaction histories since record keeping began. All parcels within the subject site share the same chain of title after purchase by Seaward Investments in 2003. MTC does not consider the chain of title for residential properties prior to 2003 to be consequential to the scope of this study. Large parcels with commercial use history are listed below:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent NPL

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/27/2013 has revealed that there are 6 WA HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 04/24/2013 has revealed that there are

EXECUTIVE SUMMARY

14 WA CSCSL sites within approximately 1 mile of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 04/24/2013 has revealed that there are 9 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/18/2013 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 3 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Registry ID: 110005264089

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 05/09/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 05/29/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 09/09/2013

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/18/2013
Date Data Arrived at EDR: 07/01/2013

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/18/2013

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/14/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/29/2013	Telephone: 703-603-0695
Date Made Active in Reports: 05/10/2013	Last EDR Contact: 06/10/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 09/23/2013
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/14/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/29/2013	Telephone: 703-603-0695
Date Made Active in Reports: 05/10/2013	Last EDR Contact: 06/10/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 09/23/2013
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326

	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/24/2013	Source: Department of Ecology

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

HIST CDL: List of Sites Contaminated by Clandestine Drug Labs

This listing of contaminated sites by Clandestine Drug Labs includes non-remediated properties. The current CDL listing does not. This listing is no longer updated by the state agency.

Date of Government Version: 02/08/2007	Source: Department of Health
Date Data Arrived at EDR: 06/26/2007	Telephone: 360-236-3381
Date Made Active in Reports: 07/19/2007	Last EDR Contact: 06/02/2008
Number of Days to Update: 23	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

USGS TOPOGRAPHIC MAP

Target Property Map:	48122-D3 MOUNT VERNON, WA
Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

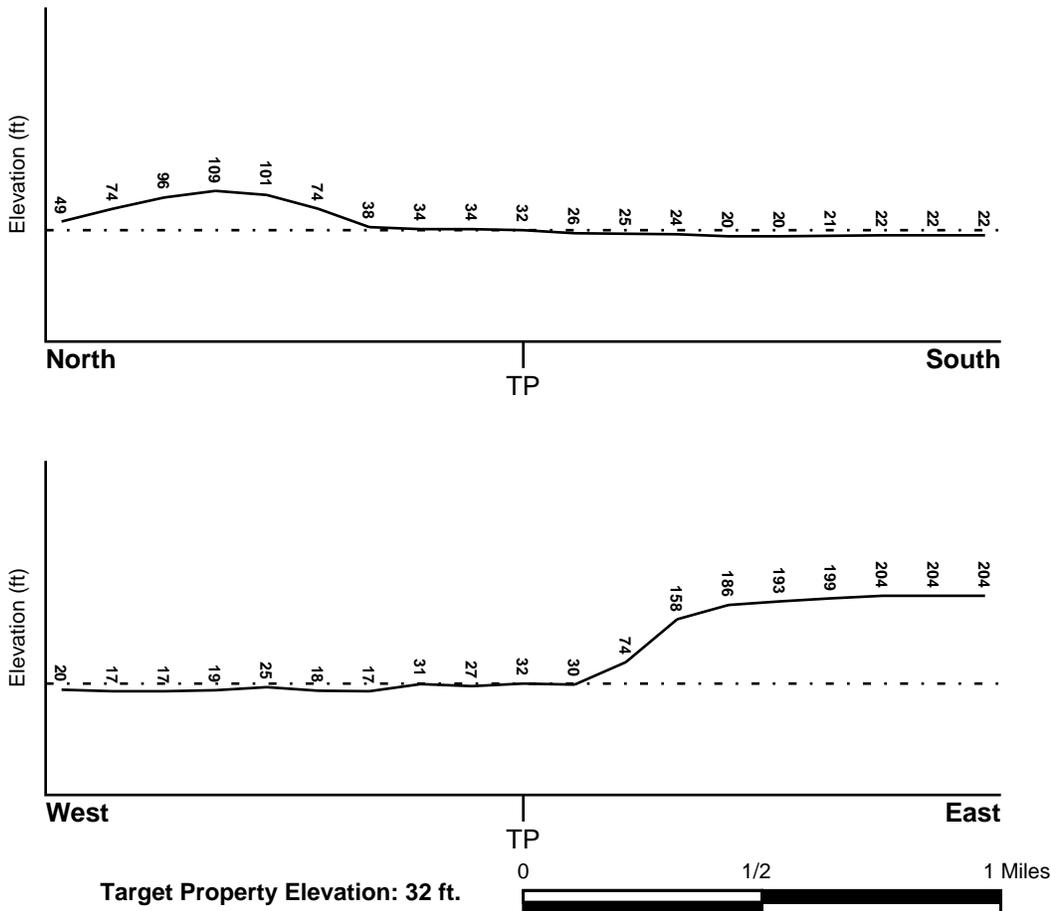

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NWI Quad at Target Property
MOUNT VERNON

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urbanland

Soil Surface Texture: variable

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 92 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: 0 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: Bow

Soil Surface Texture: gravelly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 6.1
2	7 inches	16 inches	very gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 6.1
3	16 inches	31 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 6.1
4	31 inches	59 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 6.1

Soil Map ID: 3

Soil Component Name: Vanzandt

Soil Surface Texture: very gravelly loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	very gravelly loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6.5 Min: 5.6
2	5 inches	25 inches	very gravelly loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6.5 Min: 5.6
3	25 inches	37 inches	very gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6.5 Min: 5.6
4	37 inches	59 inches	very gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6.5 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Materials Testing & Consulting (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	<u>Target Street</u>	<u>Cross Street</u>	<u>Source</u>

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.
