

## CURRENT ACTIVITIES

Efforts into the month of July will continue to focus on the installation of mechanical, electrical and plumbing components, completion and curing of the traffic coatings in the parking garage, and continued build-out activities on the first floor such as interior storefronts, paint, and floor finishes, as depicted above. Landscaping and site improvements will also continue to transform the exterior of the building.

## PROJECT HIGHLIGHT

The Mount Vernon Library Commons Project will feature artwork by local artist Cheryl Wheeler titled "Generational Wisdom." The bright and colorful original digital creation shows family members of varying ages peacefully enjoying time together to explore and learn in a well-managed Skagit County farm setting. Families are sitting and moving around the farm, sharing knowledge both with books—and of course more than books.

The different colors in the fields create a quilt-like pattern that makes the landscape eye-catching and boldly represents the community's varied backgrounds. The lighting in the piece shifts from twilight colors to a night scene with stars to demonstrate that learning and sharing knowledge is something that never stops.

This piece will be a reminder to everyone who sees it of the value of learning, teaching, and natural abundance. It's a visual to nudge the community to focus on family, continued growth, shared wisdom, and celebrating our roots.

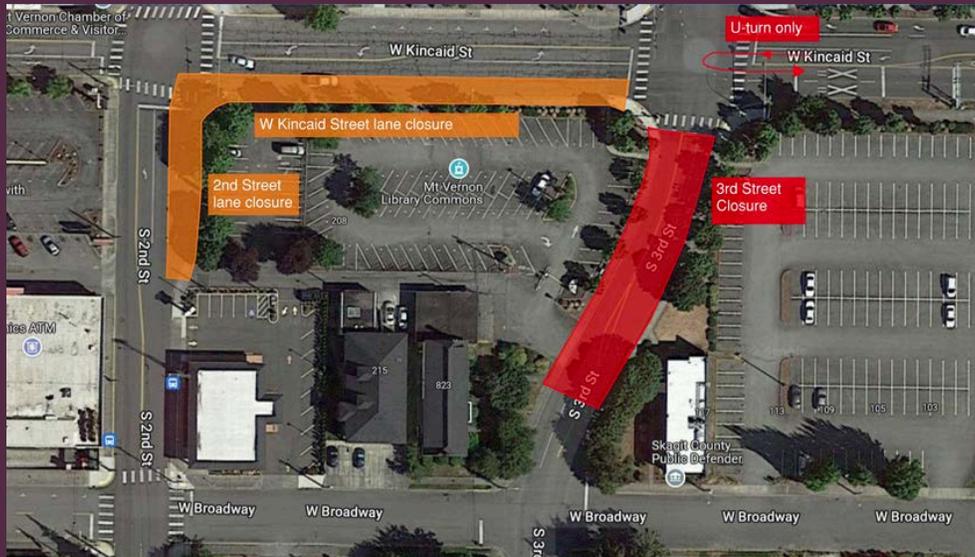

# PROJECT TRAFFIC IMPACTS

3rd Street will be closed between W. Kincaid and W. Broadway for the duration of the project. Be alert for temporary traffic revisions along S. 2nd Street & Kincaid Street as the site finishes and landscaping activities take place over the next few months.

For questions or concerns regarding project impacts, please contact the City at [Libcomconst@mountvernonwa.gov](mailto:Libcomconst@mountvernonwa.gov) or call 360-419-3252

## SCHEDULE

The majority of scheduled activities into the month of July will be focused on the construction of the exterior and interior finishes, installation of mechanical, electrical and plumbing finishes, and elevator installation.
